

# MODEL 2550T

## Hydrostatic Stump Grinder

The Model 2550 Track is a high production stump grinder with the go-anywhere mobility of a track machine. With a **49 or 49.4-horsepower diesel engine**, it's packed with the power to meet the needs of professional stump grinder contractors who need a dependable machine and reliable workhorse. The **heavy-duty rubber tracks** provide great traction and flotation, while remaining turf-friendly for delicate surfaces and lawns. The Model 2550 Track features a capable **hydrostatic motor** to directly power the cutter wheel, eliminating the need for a clutch, jackshaft, drive belt, belt tensioning system, and the many shaves and bearings associated with those components. This **reduces downtime**, resulting in a more productive machine out in the field and a lower cost of ownership.

### MANEUVERABLE AND POWERFUL

- **Heavy-duty rubber tracks**
- Standard **operator's console** with **optional wireless remote**
- As capable in back woods as it is in back yards

### Heavy-Duty Rubber Tracks

The undercarriage on the Model 2550 Track is designed and built in-house by Bandit Industries. Thoroughly tested, this powerful, capable drive system utilizes rubber tracks that are **turf friendly** while providing **low ground pressure** for sensitive areas. With a machine weight of approximately 2,560 pounds, the Model 2550 Track is easy to transport, **easy to maneuver**, and at 35" wide, narrow enough to fit through tight spaces and backyard gates.

### High Power With Low Maintenance

Bandit's hydrostatic direct-drive stump grinders deliver all the **stump grinding power** demanded by professionals, without all of the maintenance normally associated with stump grinders. It's not uncommon for companies to see maintenance costs drop by as much as 30%, compared to traditional stump grinders.

### Class-Leading Performance

The Model 2550T features a class-leading **53-1/2" cutter swing** for grinding, while also grinding to a depth of 15". Equipped with the Bandit **Revolution wheel** as standard equipment, you'll spend less time repositioning and changing teeth and more time grinding.

### Specifications

#### Dimensions:

|                      |             |                 |             |
|----------------------|-------------|-----------------|-------------|
| Length (with blade): | 118"        | Height:         | 54"         |
| Weight:              | 2,560 lbs.  | Width:          | 35"         |
| Fuel Tank:           | 8.5 gallons | Hydraulic Tank: | 8.5 gallons |

#### Cutter Wheel System:

|  |                                 |
|--|---------------------------------|
| 21" diameter x 1-1/4" thick Revolution wheel |                                 |
| Cutter Depth:                                | 15"      Cutter Height: 23-1/2" |
| Cutter Swing:                                | 53-1/2"                         |

#### Drive System:

Self-propelled drive system, with a travel speed of 140 FPM

#### Engine:

49-49.6-HP engine options available
