FULL PRODUCT LINE
AN OVERVIEW OF PRODUCTS OFFERED BY BANDIT INDUSTRIES, INC.
The year was 1983. The very first Bandit® chipper was built in a 6,000 square-foot converted repair shop, with the assistance of just six employees. That first machine was the Model 100 Brush Bandit™–a 12-inch capacity, hand-fed disc style chipper (shown here).

Today, Bandit’s complete product lineup offers more than 50 different machines to choose from, each packing the reliability, durability, efficiency, and production that have made Bandit hand-fed chippers world famous. All Bandit equipment utilizes welded construction with the highest grade materials available.

And when it comes to options, nobody offers more personalization than Bandit. It’s easy to see why more than 50,000 Bandit machines have been sold in over 50 countries. And it’s easy to understand why more professionals trust Bandit for their wood waste processing needs.

BANDIT INDUSTRIES CORE VALUES

Honesty and Integrity - We hold ourselves to the highest integrity and ethical behavior and deliver what we promise. We strengthen our reputation through trust. Our dealers, customers, suppliers, community and employees must be able to trust what we say and we must be confident that we will keep our commitments.

Performance Excellence - Bandit’s dedication to quality, performance and customer support is what differentiates us from the competition. It is our employees’ personal pride and customer focus that continually drives us to improve our processes and the products and services we provide. Our continued success depends on addressing the needs of our employees and exceeding the expectations of our dealers and customers.

Teamwork - Bandit’s diverse set of talents, thinking and opinions is what makes our team strong. We respect and value differences in opinions, experiences and backgrounds. We know that only by working together, we can produce better results than any one of us can achieve on our own.

Commitment - We make meaningful commitments to each other and those with whom we work and serve. We are committed to providing a safe, personally satisfying work environment for our employees. The commitment we share is essential to meet the needs of our dealers and customers. It is our duty to carry forward the Bandit legacy.

THE BANDIT BACKBONE™ PRODUCT SUPPORT DEPARTMENT: 888-847-7807

The Bandit Backbone is Bandit’s commitment to customer service and support. It’s always been a cornerstone of Bandit’s philosophy, and today that backbone is stronger than ever. If you own a Bandit machine—regardless the age, hours, or warranty status—the Bandit Backbone is here to support you.

FREE TECHNICAL SUPPORT

When you call our nearest authorized Bandit dealer or the product support department, you’ll be connected to a team of well-trained Bandit veterans with specialized experience. These specialists can provide guidance on everything from machine functions to maintenance procedures, electrical systems, and much more. This service is available to anyone, regardless of the machine, its age, or warranty status. It’s free of charge.

PARTS AND SERVICE WHEN YOU NEED THEM MOST

The Bandit Backbone includes factory parts support and both parts and service support from over 200 Bandit authorized dealers worldwide. When problems arise, Bandit is committed to getting you back up and running with minimal downtime.
DURABILITY, PERFORMANCE & PRIDE: THE BRUSH BANDIT™ LEGACY

FOR OVER 30 YEARS, BANDIT® HAND-FED CHIPPERS HAVE BEEN AT THE CORE OF SUCCESSFUL TREE CARE COMPANIES AROUND THE WORLD. They are designed to be the best-performing chippers on the market, and to meet the demands of hard-working professionals year after year. Every Bandit hand-fed chipper is built by specialized teams using the highest grade components with solid welded construction. They’re simply built to be the best.

That’s why it’s no surprise to see Bandit hand-fed chipper still serving front-line duty for five or even twenty years, packing up thousands of hours of use. That’s why Bandit hand-fed chippers have the best resale value of any chipper on the market. That’s why tens of thousands of tree service professionals use their Bandit chippers every day to get the job done quicker with minimal downtime for maintenance. It’s why Bandit equipment owners take such pride in their machines. And it’s why Bandit hand-fed chippers lead the industry done quicker with minimal downtime for maintenance. It’s why Bandit equipment owners take such pride in their machines. And it’s why Bandit hand-fed chippers lead the industry.

They’re simply built to be the best.

Heavy-duty materials and components with solid welded construction help these machines withstand the daily rigors of chipping. It’s not uncommon for a Bandit hand-fed chipper to be in service for over a dozen models and a broad range of chipping capacities in both styles to choose from. Whether you prefer the cutting action of a disc or the crushing power of a drum, Bandit offers a range of options to meet your needs.

INTRODUCING THE XPC-SERIES CHIPPERS

Bandit XPC chippers are heavy on chipping power while limiting optional add-ons to reduce the weight and size and improve the maneuverability. This makes them ideal for utility companies and rental customers who crave a chipper with the durability of a Bandit in a lighter package.

Who uses Bandit chippers?

Professional arborists, tree care companies, utility line contractors, orchards, municipalities, park and maintenance teams, and many more!

Hand-fed chippers

12” capacity (100%) or 15” capacity (100%)

Hand-fed chippers are heavy on chipping power while limiting optional add-ons to reduce the weight and size and improve the maneuverability. This makes them ideal for utility companies and rental customers who crave a chipper with the durability of a Bandit in a lighter package.

Diesel engine prices

37” DIAMETER CHIPPING DRUM is larger than the drum used by most fuel manufacturers. The larger drum spins at a lower RPM, generating more torque while chipping most material with the grain of the wood to increase production, improved fuel economy, and reduced machine vibration.

High Production with Low Maintenance

Expect significantly less maintenance and downtime with a Bandit hand-fed chipper. Heavy-duty materials and components with solid welded construction help these machines withstand the daily rigors of chipping. It’s not uncommon for a Bandit hand-fed chipper to be in service for over a dozen models and a broad range of chipping capacities in both styles to choose from. Whether you prefer the cutting action of a disc or the crushing power of a drum, Bandit offers a range of options to meet your needs.

Commitment to Safety

Bandit takes the continuous exceeding ANSI and OSHA safety requirements and recommended practices, and is very proud to be an industry leader when it comes to safety in the tree care, logging, wood and waste processing industries. Bandit hand-fed chippers come standard with features such as Last Chance Cables, a pusher paddle for feeding small material into the chipper, high-velocity air, engine disable plug, safety control bar, safety decals, and much more.

Options galore

Customization has always been a hallmark of Bandit equipment. A wide range of colors and diesel or gasoline engine options allow companies to match chipper to their fleet.

Numerous convenience features and options such as winches, heavy-duty welded shelf trays, hydraulic BT cylinders for feed systems, hydraulic discharge systems, and much more are available.

Self-propelled track undercarriages are extremely popular, allowing operators to take the chipper straight to the trees. On larger chipper, built-in loader systems help process large material without the need for additional loading equipment.

Switch option

Whether you prefer the cutting action of a disc or the crushing power of a drum, Bandit offers a range of options to meet your needs.

Model XP-XPC WITH TRACK UNDERCARRIAGE
**STUMPING THE COMPETITION FOR OVER A DECADE**

Bandit’s current stump grinder lineup is the culmination of more than 12 years of development, implementation, real-world experience, and most importantly, collaboration with Bandit customers to continually fine-tune designs. Durable construction provides years of reliable service, while innovative features such as expanding track undercarriages and beltless hydrostatic direct drive give Bandit® stump grinders a clear edge over the competition.

JOIN THE REVOLUTION: **GRIND FASTER WITH LESS CLEANUP**

The Revolution cutter wheel delivers smoother, deeper cuts with superior chip containment and lower operating costs. The secret is its spiral design and aggressive teeth that not only cut better than anything else on the market, but have a substantial lifespan. The Revolution cutter wheel is standard on nearly all Bandit stump grinders.

PREFER GREENTEETH FOR YOUR STUMP GRINDER?

Bandit grinding wheels with Greenteeth are optional.

**SELF-PROPELLED WITH FLotation TIRES OR TURF-FRIENDLY TRACKS**

Choose between a variety of large and small stump grinders with flotation tires or tracks for all-terrain capability. Track undercarriages for the Model 2650T and 2900T can expand for stability, then retract to fit through backyard gates. Bandit’s high-power drive systems have multiple speeds to get you to and from the stumps quicker – even the Bandit HB20 Sidewinder handlebar stump grinder is self-propelled for easy operation. Just engage and go.

**YOUR JOB DOESN’T STOP AT THE STUMP**

Innovation and experience is nothing without variety. That’s why Bandit offers 11 stump grinder models, ranging from compact self-propelled units to large track machines capable of grinding massive stumps in a matter of minutes. The size of the job doesn’t matter; Bandit has a stump grinder to fit your needs.

**STUMP GRINDERS**

- **MODEL 2250R**
  - 15” Diameter Wheel
  - 25 HP

- **MODEL 2550**
  - 21” Diameter Wheel
  - 49.6 HP

- **MODEL 2650**
  - 21” Diameter Wheel
  - 67 - 74 HP

- **MODEL 2890SP**
  - 24.5” Diameter Wheel
  - 165 HP

- **MODEL 3100 TOWABLE**
  - Available with a 122-HP Tier 4 diesel, 165-HP gas V8 power and belt drive, the Model 3100 is high-production, cost-effective stump grinding powerhouse.

- **MODEL ZT1844**
  - 18” Diameter Wheel
  - 26.5 - 38 HP

- **MODEL ZT1844 STUMP GRINDER**
  - The 3100E is a compact, maneuverable and extremely capable track stump grinder that’s an excellent rental machine for both homeowners and stump grinding professionals. With either a 26- or 38-horsepower EFI gas engine, grinding depth of 12 inches and a 44-inch side-to-side cutter wheel swing, it has the power and performance that professionals need. All 30-inch wide track models have easy tracks that fit through backyards, and its user-friendly with simple controls, but friendly tracks and zero-turn capability.

**JOIN THE REVOLUTION:**

- Faster Cleanup. Better chip containment means less mess at the site.
- Less Maneuvering. A wide swing arc means less repositioning at the stump.
- Precise Movement. Our self-propelled units do not creep back during grinding.
- Easy Transport. Custom transport trailers are made with Bandit stump grinders in mind.

- Easy Transport. Custom transport trailers are made with Bandit stump grinders in mind.
Whole Tree Chipper

For 25 years, Bandit whole tree chippers have been the go-to chippers of choice for logging companies, saw mills, land clearing operations and more. Time and again these machines have proven their ability to chip chips harder than using less fuel, packing more chips per load. No other manufacturer can match Bandit's durability, longevity and reliability — forged through heavy-duty components, solid welded construction, and supported by a five-year GUTS warranty.

LEGENDARY THROWING POWER

Many rival chippers use power-robbing auxiliary chip throwers to fill trailers, but Bandit whole tree chippers don't. Legend has it the whole tree chipper was first introduced in 1991. Today, industry-proven CAT® steel-track Bandit introduced the industry's first self-propelled track whole tree chipper. For 25 years, Bandit whole tree chippers have been the go-to chippers of choice for logging companies, saw mills, land clearing operations and more. Time and again these machines have proven their ability to chip chips harder than using less fuel, packing more chips per load. No other manufacturer can match Bandit's durability, longevity and reliability — forged through heavy-duty components, solid welded construction, and supported by a five-year GUTS warranty.

BIOMASS MARKETS PREFER BANDIT CHIPS for a range of boiler types and end uses, including direct fire and co-fire applications. Bandit chips routinely pass even the most stringent chip specs, bringing additional revenue to chip producers. Pulping and paper mills prefer chips from Bandit disc-style bandit whole tree chippers and drum-style bandit whole tree chippers, to their consistent size and thickness.

Livermore Throwers

The Beast® builds your bottom line

The horizontal grinders have continually evolved since entering the waste reduction market in 1995, maintaining their position as the most versatile and productive horizontal grinders available. These machines are industry proven when it comes to efficiency, durability, and the quality of the end-product created from the patented cuttermill. The Beast® models provide greater output for your bottom line.

The key to The Beast®’s success is its unique cuttermill. It starts with a spiral pattern of teeth, allowing the cuttermill to process material using a cutting / splitting action versus other recirculating systems that attempt to burst material through hammering and grinding. The difference is best explained like this: it’s far easier to cut down a tree with an ax than a sledgehammer.

The Beast® equipped with the Color Max will outperform all other coloring systems and all stand-alone coloring systems.

The Beast® equipped with the Color Max will outperform all other coloring systems and all stand-alone coloring systems.

OPTIONAL PROPORTIONAL INFEED DRIVE SYSTEM

provides an infinitely adjustable feed speed, automatically matching engine load for continual feeding. The system can be easily turned off to return to normal auto-feed operation.

COLOR MAX AVAILABLE

The Beast® equipped with the Color Max will outperform all other coloring systems and all stand-alone coloring systems.

DIESEL OR ELECTRIC POWER

Choose from a wide range of diesel engines up to 1,200 horsepower or, on the fuel and electric, The Beast® can be configured with heavy-duty AC/DC electric motors up to 1,500 horsepower. Soft-start panels and all necessary equipment is included to easily set up electric-powered units for stationary operation.

The Beast® features a down-turn cuttermill that works with gravity, not against it. There are many advantages to this design – material is processed quicker and easier in a single pass, creating a better end-product. There is less wear on the feed wheel, and the track-chain infeed serves as a rotating anvil that eliminates hang-ups found on real machines with up-turn mills.

The Beast® patented cuttermill

is readily adaptable to a variety of materials. There are many advantages to this design – material is processed quicker and easier in a single pass, creating a better end-product. There is less wear on the feed wheel, and the track-chain infeed serves as a rotating anvil that eliminates hang-ups found on real machines with up-turn mills.

**SKID-STEER ATTACHMENTS**

**BANDIT SKID STEER ATTACHMENTS MAKE LAND CLEARING EASIER THAN EVER**

Turn your skid steer loader into a powerful land clearing machine with Bandit stump grinding and mulching attachments. Designed in house by Bandit, these attachments operate via the skid steer’s hydraulic system and are extremely simple to use. They attach in seconds to machines using quick-attach plates, and with just a few moving parts they are very easy to maintain. Bandit skid steer attachments are built with the same high-quality materials and receive the same attention to detail as all Bandit machines, making them a reliable, productive, long-lasting addition to any operation using skid steer loaders.

**ADD VALUE TO YOUR SKID STEER LOADER WITH A BANDIT ATTACHMENT.**

**MODEL 60FM / MODEL 72FM**

Bandit forestry mulchers are available in either a 60” or 72” wide cut. These attachments are ideal for clearing thick brush and small trees, grinding material and mulching it directly into the ground. Their compact size makes them excellent for clearing tight spaces, lot clearing, and selective forest thinning. The superior teeth in these mulchers were designed from years of experience in processing wood with The Beast®, providing great tooth life at an affordable price.

**BANDIT MODEL SA-25**

Blow stumps away with Bandit’s Model SA-25, a powerful stump grinder attachment that sits on the front of any skid-steer loader that accepts a universal attachment plate. Maintenance of the SA-25 is extremely simple because the unit operates on the skid steer’s existing high-flow hydraulic system. The SA-25 increases the versatility of popular machines used all over the world. This easy-to-maintain design is effective on any stump, large and small.

**BTC-300 TRACK CARRIER**

**94" FORESTRY MOWER • 44” DIAMETER STUMP GRINDER**

The BTC-300 is a completely new track carrier from Bandit Industries. From its redesigned deluxe operator’s cab with its outstanding visibility, lower ground pressure, and numerous mechanical updates and Tier 4 engine power, the BTC-300 delivers exceptional land clearing performance with exceptional reliability and class-leading levels of comfort. Built from extensive customer feedback and over a decade of experience with track carriers in high-production land clearing environments, the BTC-300 further builds on Bandit’s vision for a high-performance, full-terrain mowing and stump grinding machine.

**BTC-300 WITH STUMP GRINDER ATTACHMENT**

**BTC-300 WITH FORESTRY MOWER ATTACHMENT**

**AVAILABLE WITH INTERCHANGEABLE MOWING AND STUMP GRINDING ATTACHMENTS**

Whether clearing acres of trees or fields of stumps, the BTC-300 can handle it in newly designed mowing and stump grinding attachments. The forestry mower features a very wide 90-inch cut and can easily take down small to medium sized trees. A patent pending tooth and holder design aggressively processes trees, limbs and brush, mulching it all directly into the ground. The stump grinding head features a 44-inch diameter grinding wheel with a deeper reach, and it offers 30% more torque than previous models for quick efficient grinding. Switching between the attachments is extremely easy, taking less than 10 minutes in the field.

**BTC-300 WITH DELUXE OPERATOR CAB**

With ROPS/FOPS/UDS/CERTIFICATION

Operators will not want to leave the BTC-300’s luxurious, state-of-the-art operator’s cab. Ballistic-grade poly-carbonate windows negate the need for window guards, providing superior visibility while all meeting ROPS/FOPS/UDS certification. Plush interiors with rubber-isolated cab mounts create a surprisingly quiet atmosphere for operators to work, yet still allow the cab to deliver maximum comfort. Industry-leading HVAC systems with window and foot vents ensure cool operation in summer and plenty of warmth in winter. Additional convenience items like comfort soft phone holders, 12V charging ports and oversized cup holders ensure no other operators are treated as well as in any other machine.

IF YOU CAN DREAM IT, BANDIT CAN BUILD IT.

Your operation is unique. That's why Bandit offers the most comprehensive range of wood processing equipment, including specialty machines and custom-built designs to fit your specific needs. Contact Bandit to learn more about custom designs.

**PTO CHIPPERS**

PTO-powered chippers are ideal for orchards, farms or estates where tractors or other PTO-capable vehicles are already in-use for grounds maintenance. PTO chippers are available as towable or tractor-mount with a three-point hitch. New 9" and 12" PTO chipper options are driven via PTO shaft from a chip truck, and are available with either a rear or curb-side feed.

**CUSTOM COLORS**

Match your Bandit to the rest of your fleet! Six standard colors are available to choose from, with unlimited custom colors available upon request.

4" Capacity
18 HP and PTO option

**CUSTOM DESIGNS**

Because Bandit machines are built by specialized teams and not on an assembly line, incorporating custom designs to fit unique needs is not a problem! Contact Bandit to learn more about customized equipment.

**MODEL 1690 CONVENTIONAL DRUM CHIPPER**

Still popular with utility line crews and maintenance companies with large fleets, this new maintenance chipper replaces a feed system. Material is pulled in directly by the 16" diameter four-knife chipping drum and features a 10" by 16" throat opening. Chips exit through a stationary discharge, with an auxiliary side discharge optional.

**CHIPPER / CHIP BOX COMBO UNITS**

Available with Bandit 9" and 12" capacity chippers, these units feature a tilting chip box with the chipper mounted on a turntable. The all-in-one design eliminates the need for a towing vehicle with a chip box.

**CUSTOM WHOLE TREE CHIPPER WITH REMOTE CONTROL GRAPPLE LOADER**

Model 2400XP (without infeed tray) to produce debarked or undebarked whole tree chips.
